

# Easy CAST LINER

THE SLOWEST BUT FASTEST INTERNAL PIPE SLEEVE FOR PIPE REPAIR WITHOUT DIGGING

BASED ON SPACE-AGE SEAMLESS FIBERGLASS TUBE

**Cut**

REPAIR 12 FOOT OF PIPE IN 30 MINS YET HAVE UP TO 60 MINS APPLICATION WINDOW

APPLY BY SPRAY OR ROLLER...WORKS IN 2" - 24" (50MM-600mm) DIAMETER PIPES

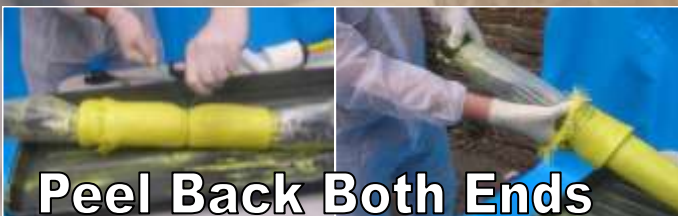

**Sleeve**

GLOSSY GLASS-LIKE FINISH EVEN ROUND 90 DEGREE BENDS

**Dry Tie**

NO EXPENSIVE EQUIPMENT REQUIRED .... AND YET SO EASY TO APPLY !!!

**Peel Back Both Ends**

**Spray or Spread-On**

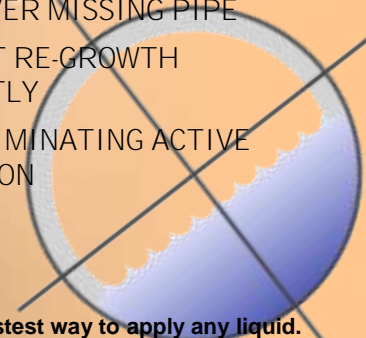

**Insert and Inflate**

## BOOST YOUR PROFITS !!!

- **1/8" THICK INTERNAL FIBERGLASS SLEEVE CAST INSITU**
- CHOICE OF LENGTH 2—12 FT
- NO EXCAVATION REQUIRED
- WORK FROM CLEAN-OUT OR EXISTING MANHOLE
- STRUCTURAL FIX FOR BROKEN PIPE

## GUARANTEED PERFORMANCE

- 50 YEAR ASTM DESIGN LIFE
- BASED ON WRc TESTED RESIN
- BRIDGES OVER MISSING PIPE
- STOPS ROOT RE-GROWTH PERMANENTLY
- USE FOR ELIMINATING ACTIVE INFILTRATION

## LESS THAN 5 MINUTE APPLICATION

**Spraying is the fastest way to apply any liquid. Fact !.** The resin is spray applied in typically seconds, only after the dry glass tube has been secured to the packer and all other components are connected to the packer. This reduces the risk of premature setting. This fact, coupled with the rapid cure of the Spray Cast, means most jobs are completed within 30 minutes !!!! Start to Finish.

## "DRY LOCK" SECURING OF FIBERGLASS TUBE

One of the problems with flat sheets of fibreglass is the resin is applied to the fibreglass prior to securing the sheet to the packer. This means operatives are required to secure ties or cable ties, in great haste, using slippery hands on a slippery surface. Potential recipe for disaster !. The advantage of using a seamless glass tube is there is little or no risk of the glass opening up and unravelling or sliding as the tube is securely attached to the packer in a totally dry state.

## GLASS FINISH ROUND BENDS

Due to the unique construction of the fiberglass tube, the system delivers a glass-like finish even around bends, time after time....no If's...no Buts.. !!!

## MATERIAL SUPPLIED IN KIT FORM

For simplicity, all the consumable items you need to carry out the repair are packaged in a box even down to a pair of gloves !!!

## MAY BE APPLIED BY ONE MAN

By supplying the Fiberglass in Tube most of the work is done in advance for you. This is why some only utilise a one-man crew for Easy-Cast work. All you need to do is spray and push or pull the inflatable plug into place.

## SIMPLE PORTABLE EQUIPMENT

The equipment is simple to use, and easy to replace or fix. The resin is mixed in a disposable cup, the spray head is clamped to the cup and away you go. On completion, the only item to clean is the removable nozzle. Only other items required are an inflatable packer, compressor, hose reels and push rods or winch.
